## **ASSIGNMNET 2.1**

1. The nbqa package provides a command-line tool to run various code quality tools on Jupyter notebooks. To format markdown cells in a Jupyter notebook file my\_notebook.ipynb, you can use the following command:

2. While execution of nbqa blacken-docs **my\_notebook.ipynb --nbqa-md** command it will rewrite the concerned cell and will correct the format that was disturbed in upper markdown as code.

**moiz (2303.KHI.DEG.022)**

**xloop task 2.1**

```
fruits = ["apple", "banana", "cherry"]
for x in fruits:
    print(x)
```
