2023-05-05 3:21:59 0 [Warning] You need to use --log-bin to make --expire-logs-days or --binlog-expire-logs-seconds work.

PLEASE REMEMBER TO SET A PASSWORD FOR THE MariaDB root user !
To do so, start the server, then issue the following command:

'/usr/bin/mysql_secure_installation'

which will also give you the option of removing the test
databases and anonymous user created by default. This is
strongly recommended for production servers.
